TITLE: Evaluating the impact of cannabis legalization in the Canadian territories

OBJECTIVES OF RESEARCH:

This research will provide decision makers in northern Canada with ongoing feedback in the early stages of cannabis legalization, and evidence on the longer-term public health effects.

The study has five objectives:

1. To examine prevalence and patterns of non-medical cannabis use, including use among young adults, age of initiation, and levels of dependence;
2. To examine the cannabis retail environment, including illicit versus legal sources, and the products used;
3. To assess changes in problematic use and risk behaviours, including driving after cannabis use, use in high risk occupational settings, and co-use with other substances;
4. To examine changes in perceptions of risk and social norms; and,
5. To evaluate the effectiveness of specific regulatory policies, including marketing and education campaigns, and use in public and workplaces.

TERMS & CONDITIONS:

The license holder will abide by the terms and conditions imposed by the Inter-agency Health Review Panel and by all special public health protection measures imposed by Nunavut's Chief Medical Officer of Health in response to the Covid-19 Pandemic, including restrictions on non-essential travel to Nunavut. These terms and conditions will form part of this license.

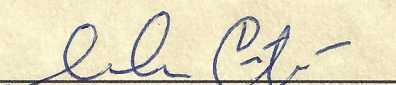

DATA COLLECTION IN NU:

DATES: September 1, 2021 to October 31, 2023

LOCATION: All Nunavut Communities

Scientific Research License 05 001 22R-M expires on December 31, 2022

Issued at Iqaluit, NU on January 24, 2022
